BMC AMI Ops Automation for Batch ThruPut Learning Track: Operators

Recommended for: Operators

Product versions:

BMC Compuware ThruPut Manager 18.02
BMC AMI Ops Automation for Batch ThruPut 22.04

BMC AMI Ops Automation for Batch ThruPut (formerly known as BMC Compuware ThruPut Manager) can help you automatically and intelligently optimize your batch processing to resolve hidden problems in manual batch processing. By balancing workload and improving batch throughput, ThruPut Manager also delivers significant savings in software license fees and IBM Monthly Licensing Charges (MLC).
