

BMC AMI Ops z/OS

Learning Path

BMC AMI Ops for z/OS® Learning Track: System Programmers

WBT
Web-based Training

CERT
Certification

ILT
Instructor-led
Classroom/Online

ASP
Assisted Self Paced

Recommended for: System Programmers

Product versions: 6.4

The BMC AMI Ops Monitoring solution provides the ability to monitor and manage the performance and availability of your IBM z/OS and z/OS Unix environments. It allows operators and system programmers to identify problems quickly, no matter where they appear in your z/OS environment and track an exhaustive array of critical metrics.

The BMC AMI Ops Monitor *for z/OS* product (formerly known as the MainView *for z/OS* product) is a system-management application that provides a wide range of services and functions to help you manage the performance of your entire system.

— Mandatory Path - - - Optional Path

BMC AMI Ops Infrastructure 7.x:
Fundamentals Using the User
Interface (WBT)
Duration: **2 Hours**

BMC AMI Ops Infrastructure
7.x: Fundamentals Using
Duration: **3 Days**

BMC AMI Ops Monitor for z/OS® 6.x:
Fundamentals Concepts (WBT)
Duration: **4 Hours**

BMC AMI Ops Monitor for z/OS®
6.x: Fundamentals
Troubleshooting Performance
Problems (WBT)
Duration: **3 Hours**

Apr25 Release

BMC Certified Associate: AMI
Ops for z/OS® 6.x for System
Programmers Online Exam
Duration: **2 Hours**
